

April 2, 2015

To Whom it Concerns;

I have been asked to write a brief note pertaining to the installation and support we have received from LED North America for our new LED sports lighting at Thompson-Boling Arena. To date I would say that we are satisfied well beyond expectations with both the product and the corresponding service.

Andy Wilhelm and his staff his staff have responded quickly and efficiently to any requests that we have made of their company. We have had the product in place for over one year and the need for any servicing has been virtually non-existent. Any minor adjustments or questions have been immediately addressed.

We did the installation during our 2013-14 basketball season and even with ongoing events and activities we were about to have the project completed on time for some late season use. LED North America was extremely flexible in their work schedule so the installation proceeded as planned.

If you need additional information about the success of our new LED sports lighting please feel free to call me directly.

Sincerely;

Tim Reese

Arena Manager
